Profile Summary

Computer Science graduate and Associate Software Engineer with experience in full-stack development, automation, and AI application workflows.

Builds and maintains frontend and backend features, works with MongoDB, and translates user stories into tested software changes.

Developed a document intelligence assistant using RAG, hybrid retrieval, document-aware navigation, guardrails, and evaluation tools.

Interested in building reliable software and practical Generative AI applications.

Work Experience

TCS, Gandhinagar Present

Associate Software Engineer – Full Stack Developer

- Develop and maintain frontend and backend application features based on assigned requirements and user stories.
- Work with MongoDB to support application data operations and integration between application components.
- Investigate defects, debug application behavior, and test changes before handoff to help maintain reliable releases.
- Collaborate with team members to clarify requirements, implement updates, and communicate progress on assigned work.

Tor.ai Oct 2025 – March 2026

Pre-Sales & Data Operations

AI-driven enterprise automation platform focused on process intelligence, workflow automation, and data-driven decision support across multiple industries.

- Processed and enriched **10,000+ lead records** using Python, Excel (XLOOKUP), n8n, and AI-assisted workflows across **7+ industry sectors**.
- Analyzed and shortlisted **300+ global and Indian expos** using AI-assisted research and data evaluation, identifying high-ROI events such as **EXCON**, BuildElec, and ACREX.
- Automated lead enrichment and outreach pipelines, reducing manual effort by **60–70%** and supporting **100+ targeted leads** for EXCON 2025.

Projects

BigBasket Data Analysis Dashboard | *R, Power BI, Data Analysis*

- Analyzed **8,000+ product records** to identify pricing trends, discount patterns, and customer behavior insights.
- Performed **data cleaning, exploratory data analysis (EDA), and clustering** using R (dplyr, ggplot2, factoextra).
- Built **interactive Power BI dashboards** and applied **NLP-based sentiment analysis** to derive actionable insights.

Smart Fall Detection System (Capstone Project) | *Python, ML, IoT, Time-Series Data*

- Built an end-to-end fall detection system using self-collected **6-axis IMU sensor data** capturing real-world activity and fall scenarios.
- Performed **time-series preprocessing** including data cleaning, segmentation, and feature preparation for model training.
- Applied a **Mixture of Experts (MoE)** model to improve classification reliability and enabled **real-time WhatsApp alerts** for caregiver notification.

MediBot – AI Medical Information Assistant | *Generative AI, Prompt Engineering, API Integration*

- Developed a GenAI-based assistant that converts structured medical inputs from multiple form fields into clear, context-aware responses.
- Designed prompt engineering workflows to transform user symptoms into structured summaries and AI-generated guidance.
- Integrated API-based AI responses with a lightweight frontend for automated response generation and consistent output formatting.

AI-Powered LinkedIn Content Generator | *Generative AI, NLP, Prompt Engineering, API Integration*

- Built an AI-driven tool to generate professional LinkedIn posts from minimal inputs such as topic, tone, and audience type.
- Implemented structured prompt pipelines to generate engaging, platform-optimized content with consistent formatting.
- Automated content drafting workflow, reducing manual effort and enabling rapid content generation using GenAI

models.

AI Document Intelligence Assistant (RAG System) | *Python, FAISS, BM25, RAG, Streamlit, Ollama*

- Built a PDF question-answering assistant that extracts text and page metadata, creates overlapping chunks, and answers questions using retrieved document evidence.
- Combined **FAISS semantic retrieval**, **BM25 keyword search**, and document-tree navigation; added query routing, relevance filtering, and reranking to select context for different question types.
- Added layered safety checks for user input, retrieved content, and generated output, alongside source lineage, PII-aware handling, and rate limiting.
- Implemented caching and inference instrumentation for latency and token usage, plus evaluation workflows covering faithfulness, context precision, answer relevance, and correctness.
- Added feedback/memory-assisted prompting to reuse lessons from prior errors, and support for general chat and web research; this does not retrain model weights.

Education

Vellore Institute of Technology, Chennai — Aug 2021 – Apr 2025
B.Tech in Computer Science and Engineering — *CGPA: 7.80*

Abhishek Junior College, Pune — Jun 2020 – Apr 2021
12th Grade, MSBSHSE — *92%*

Podar International School, Pune — Mar 2018 – Apr 2019
10th Grade, ICSE — *88.17%*

Technical Skills

Programming	Python, SQL, JavaScript/TypeScript, R, C/C++
Full-Stack Development	Frontend Development, Backend Development, REST API Integration, MongoDB
Generative AI & RAG	LLM Applications, RAG Pipelines, FAISS, BM25, Hybrid Retrieval, Reranking, Prompt Engineering
AI Reliability	Input/Output Guardrails, Prompt-Injection Screening, PII-Aware Handling, Source Lineage, Rate Limiting
Evaluation & Observability	Faithfulness, Context Precision, Answer Relevance, Answer Correctness, Latency/Token Metrics
Data Analysis & Visualization	Power BI, Tableau, Advanced Excel, R
Automation & AI Tools	n8n, Claude, NotebookLM, Selenium, Ollama
Development Tools	GitHub, Git, Bazel, Streamlit
Data Platforms	Databricks, Apache Spark (Basics)

Certifications

Claude Certified Developer – Foundations — Oct 2026

Databricks Certified Generative AI Engineer Associate — Sep 2026

AWS Certified Cloud Practitioner — Jan 2024
Amazon Web Services

Google Data Analytics Professional Certificate — Jul 2025
Coursera (Google)

PwC Switzerland Digital Intelligence Job Simulation — Mar 2025
TCS iON

Data Visualization: Empowering Business with Effective Insights — Jun 2025
PwC

Extracurriculars

Core Management Member — Dec 2023 – Present
NSCC, VIT

- Led planning and coordination of club meetings and major events.
- Collaborated with teams and handled operational challenges effectively.
- Contributed to strategic planning and member engagement initiatives.
