PROFILE SUMMARY

Data-oriented Computer Science graduate with experience in automation, data processing, and analytics workflows. Skilled in Python, SQL, Power BI, and Excel for data cleaning, exploratory data analysis, and dashboard development. Experienced in handling large datasets and building automation pipelines to support data-driven decision-making, seeking an entry-level Data Analyst or Technology role.

WORK EXPERIENCE

Tor.ai Oct 2025 – March 2026

Pre-Sales & Data Operations

AI-driven enterprise automation platform focused on process intelligence, workflow automation, and data-driven decision support across multiple industries.

- Processed and enriched **10,000+ lead records** using Python, Excel (XLOOKUP), n8n, and AI-assisted workflows across **7+ industry sectors**.
- Analyzed and shortlisted **300+ global and Indian expos** using AI-assisted research and data evaluation, identifying high-ROI events such as **EXCON**, BuildElec, and ACREX.
- Automated lead enrichment and outreach pipelines, reducing manual effort by **60–70%** and supporting **100+ targeted leads** for EXCON 2025.

PROJECTS

BigBasket Data Analysis Dashboard | *R, Power BI, Data Analysis*

- Analyzed **8,000+ product records** to identify pricing trends, discount patterns, and customer behavior insights.
- Performed **data cleaning, exploratory data analysis (EDA), and clustering** using R (dplyr, ggplot2, factoextra).
- Built **interactive Power BI dashboards** and applied **NLP-based sentiment analysis** to derive actionable insights.

Smart Fall Detection System (Capstone Project) | *Python, ML, IoT, Time-Series Data*

- Built an end-to-end fall detection system using self-collected **6-axis IMU sensor data** capturing real-world activity and fall scenarios.
- Performed **time-series preprocessing** including data cleaning, segmentation, and feature preparation for model training.
- Applied a **Mixture of Experts (MoE)** model to improve classification reliability and enabled **real-time WhatsApp alerts** for caregiver notification.

MediBot – AI Medical Information Assistant | *Generative AI, Prompt Engineering, API Integration*

- Developed a GenAI-based assistant that converts structured medical inputs from multiple form fields into clear, context-aware responses.
- Designed prompt engineering workflows to transform user symptoms into structured summaries and AI-generated guidance.
- Integrated API-based AI responses with a lightweight frontend for automated response generation and consistent output formatting.

AI-Powered LinkedIn Content Generator | *Generative AI, NLP, Prompt Engineering, API Integration*

- Built an AI-driven tool to generate professional LinkedIn posts from minimal inputs such as topic, tone, and audience type.
- Implemented structured prompt pipelines to generate engaging, platform-optimized content with consistent formatting.
- Automated content drafting workflow, reducing manual effort and enabling rapid content generation using GenAI models.

AI Document Intelligence Assistant (Advanced RAG System) | *Python, LangChain, FAISS, BM25, Selenium, Streamlit*

- Developed an advanced **Retrieval-Augmented Generation (RAG)** system combining **BM25 keyword search and FAISS vector retrieval** for improved document intelligence and query answering.

- Implemented **structure-aware document tree navigation** and hybrid search with MMR re-ranking to improve context retrieval accuracy.
- Built a **self-healing AI pipeline** where responses are validated using Gemini and incorrect answers are corrected and stored in a persistent learning memory.
- Integrated **web research automation using Selenium** to scrape DuckDuckGo and synthesize external knowledge for unanswered queries.

EDUCATION

Vellore Institute of Technology, Chennai — Aug 2021 – Apr 2025
B.Tech in Computer Science and Engineering — *CGPA: 7.80*

Abhishek Junior College, Pune — Jun 2020 – Apr 2021
12th Grade, MSBSHSE — *92%*

Podar International School, Pune — Mar 2018 – Apr 2019
10th Grade, ICSE — *88.17%*

TECHNICAL SKILLS

Programming	Python, SQL, R, C/C++
Data Analysis & Visualization	Power BI, Tableau, Advanced Excel
Data Platforms	Databricks (Learning), Apache Spark (Basics)
Automation & AI Tools	n8n, GPT Automation, Claude, NotebookLM, Selenium
Development Tools	GitHub, Git, Bazel
Sales & Research Platforms	Apollo.io, DoubleTick
Concepts	Data Cleaning, EDA, Dashboard Design, Data Extraction, Data Validation, Prompt Engineering, Generative AI, RAG

CERTIFICATIONS

AWS Certified Cloud Practitioner — Jan 2024
Amazon Web Services

Google Data Analytics Professional Certificate — Jul 2025
Coursera (Google)

PwC Switzerland Digital Intelligence Job Simulation — Mar 2025
TCS iON

Data Visualization: Empowering Business with Effective Insights — Jun 2025
PwC

EXTRACURRICULARS

Core Management Member — Dec 2023 – Present
NSCC, VIT

- Led planning and coordination of club meetings and major events.
- Collaborated with teams and handled operational challenges effectively.
- Contributed to strategic planning and member engagement initiatives.
